*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13 and 23-34, drawn to electrical devices such as data processor or calculator, classified in class 361, subclass 683.
  - II. Claims 14-22 are drawn to telecommunication devices such as PDA or radiotelephone classified in class 455, subclass 556.2.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because electrical devices such as a calculator do not require communication means such as telephone. The subcombination has separate utility such as telephone or radiotelephone. The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the

Art Unit: 2629

present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
